- Annual Water Quality Report
- System Requirements
- Cross Connection & Backflow Prevention

Tips for Water Conservation

Alabaster Water Board recommends the following steps to help conserve water:

- Don't over water your lawn. Only water every three to five days in the summer and 10 to 14 days in the winter.
- To prevent water loss from evaporation, don't water your lawn during the hottest part of the day or when it is windy.
- Only run the dishwasher and clothes washer when they are fully loaded.
- Defrost frozen food in the refrigerator or in the microwave instead of running water over it.
